**7** Ink priming begins. This takes about 6 minutes.

Note: Your printer ships with full cartridges and part of the ink from the first cartridges is used for priming the printer.

5 Load paper

You can load letter-, A4-, or legal-size paper, as well as envelopes, and various sizes of photo paper in cassette 1. In cassette 2, you can load only letter-, A4-, or legal-size plain paper. For instructions on loading envelopes, photo paper, or legal-size paper, or using the rear feed slot, see the online *User's Guide*.

Wireless connection

You must install the software on every computer from which you want to print. For the first installation, we recommend using a USB cable (not included) to simplify wireless setup. After the printer is connected to the network, you will be prompted to remove the cable.

If you're using Mac OS X 10.6.x, 10.7.x, or 10.8.x, or you don't have a USB cable, you will need to use the control panel on the printer to select wireless settings. Follow the instructions on your computer screen during software installation; they will explain how to connect the printer wirelessly this way.

Make sure you know your network name (SSID) and network password:

- Network name _____
- Network password _____

If you don't have this information, contact the person who set up your network.

To view how-to videos on setting up your printer's wireless connection, go to **epson.com/support** (U.S.) or **epson.ca/support** (Canada).

Direct USB connection

Make sure you have a USB cable (not included).

Wired network connection
